

Work With Us

The following is to help you in deciding key facts about your website before getting in touch with us at *style:Cymru*. Do miss out any questions that don't appear to be relevant to your project. Please include additional details that you do think will be important. Once complete, be sure to contact us using the information at the end of the document or as found on our website.

Name(s) and contact details for this project (email, telephone number):

Do you have a current website or intended site name and website address (URL)?

Outline the main aims for the website - what is the website for and what do you want it to do?

(We find that this is probably best drafted on a separate sheet of paper and attached to the project as a summary)

Who are your target audience – who do you think will be visiting the website?

Why will a visitor use your site in preference to all the others that are on the internet?

How will you know if the website is a success? Do you have some criteria for knowing that your site is doing what you intended?

Describe briefly some of the content you think will be on your new website. Does the content support the site's objectives that you have in mind?

Give some key words that will describe how your site will look.
(e.g. Clean, modern, professional, quirky, youthful, fun etc.)

Are there any websites on the internet that you like that have a similar purpose to your new site? Please list any sites that have “great content”. What, if anything, is wrong with them? What is good about them?

Are there any websites that you like the look of : colour combinations, layout, particular design features or the use of types of images? Please list 3 - 5 of your favourites, with an indication of what is good about them.

Once the site design is finished, who will add more / new material when it becomes available? Would you like style:Cymru to maintain your site? Would you like a content management system or a blogging facility added to the site.

Do you have any special features or additional requirements for the website?
(Please add any additional information you think would be useful to us at this stage.)

Finally, is this a small or a large project? Can you indicate an expected range for the project budget and a time scale in which the site design needs to be completed?

Contacting style:Cymru
